

111TH CONGRESS
1ST SESSION

H. R. 2195

To amend the Federal Power Act to provide additional authorities to adequately protect the critical electric infrastructure against cyber and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

APRIL 30, 2009

Mr. THOMPSON of Mississippi (for himself, Mr. KING of New York, Ms. CLARKE, Mr. DANIEL E. LUNGREN of California, Ms. JACKSON-LEE of Texas, Ms. LORETTA SANCHEZ of California, Ms. HARMAN, Mr. CUELLAR, Mr. CARNEY, Ms. ZOE LOFGREN of California, Mr. PASCRELL, Mr. LUJÁN, and Mr. LANGEVIN) introduced the following bill; which was referred to the Committee on Energy and Commerce, and in addition to the Committee on Homeland Security, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To amend the Federal Power Act to provide additional authorities to adequately protect the critical electric infrastructure against cyber attack, and for other purposes

1 Be it enacted by the Senate and House of Represent
2 tives of the United States of America in Congress assem

3 **SECTION 1. CRITICAL ELECTRIC INFRASTRUCTURE.**

4 (a) FINDINGS.—

5 (1) The critical electric infrastructure of t
6 United States and Canada has more than \$1 trillion

1 in asset value, more than 200,000 miles of trans
2 mission lines, and more than 800,000 megawatts of
3 generating capability, serving over 300 million pe
4 ple.

5 (2) The effective functioning of this infrastru
6 ture is highly dependent on computer-based control
7 systems that are used to monitor and manage sen-
8 sitive processes and physical functions.

9 (3) These control systems are becoming increas-
10 ingly connected to open networks, such as corporat
11 intranets and the Internet. According to the Depart
12 ment of Homeland Security's United States Com-
13 puter Emergency Readiness Team (''US-CERT''),
14 this transition towards widely used technologies an
15 open connectivity exposes control systems to the
16 ever-present cyber risks that exist in the informat
17 technology world in addition to control system spe
18 cific risks.

19 (4) Malicious actors pose a significant risk t
20 this infrastructure. The Federal Bureau of Inves-
21 tigation (''FBI'') has identified multiple sources
22 threats, including foreign nation states, domestic
23 criminals and hackers, and disgruntled employees.

24 (5) Intentional or naturally occurring Electro
25 magnetic Pulse (''EMP'') events also threaten crit

1 ical electric infrastructure. The Commission to Assess
2 the Threat to the United States from EMP At-
3 tack reported in 2008 that an EMP attack could
4 cause significant damage or disruption to critical
5 electric infrastructure and other critical infrastru-
6 cture due to the widespread use of Supervisory Con-
7 trol and Data Acquisition (''SCADA'') systems. The
8 National Academy of Sciences also reported in 2008
9 that Severe Space Weather Events could produce
10 similar results.

11 (6) The Department of Homeland Security's
12 Control Systems Security Program is designed to in-
13 crease the reliability, security, and resilience of
14 control systems to guard against and enhance domestic
15 preparedness for and collective response to a cyber
16 attack by a terrorist or other person. This is done
17 by developing voluntary cyber risk reduction prod-
18 ucts, supporting the Department of Homeland Secu-
19 rity's Industrial Control Systems Computer Emer-
20 gency Response Team (''ICS-CERT'') in developing
21 vulnerability mitigation recommendations and strate-
22 gies, and coordinating and leveraging activities
23 improving the Nation's critical infrastructure secu-
24 rity posture.

1 (7) According to recent news reports, the elec-
2 tronic control systems of the electrical system in
3 United States have been routinely penetrated and
4 compromised. According to current and former na-
5 tional security officials, cyber spies from China,
6 sia, and other countries have penetrated the Unite
7 States electrical system in order to map the syste
8 and have left behind software programs that could
9 be used to disrupt and disable the system.

10 (8) In the interest of national security, and
11 enhance domestic preparedness for and collective re
12 sponse to a cyber attack by a terrorist or other p
13 son, a statutory mechanism is necessary to protec
14 the critical electric infrastructure against cy
15 threats.

16 (9) In spite of existing mandatory cybersecurity
17 standards, a report from the North American Elec-
18 tric Reliability Corporation (``NERC'') suggests th
19 many utilities are underreporting their assets, pot
20 tially to avoid compliance requirements. In Apri
21 2009, NERC reported that only 23 percent of re-
22 sponding utilities identified a ``Critical Cyber As
23 as required by NERC Reliability Standard 002-1.
24 According to NERC, the results of this survey sug-
25 gest that utilities may not have identified cert

1 qualifying assets as ``Critical``. NERC requested
2 that entities take a fresh, comprehensive look at
3 their methodology in order to identify and secure
4 more Critical Cyber Assets.

5 (10) On May 21, 2008, in testimony before the
6 House Committee on Homeland Security, Joseph
7 Kelliher, then-Chairman of the Federal Energy Reg-
8 ulatory Commission (``the Commission``), stated that
9 his agency is in need of additional legal authori-
10 to adequately protect the electric power system
11 against cyber attack.

12 (b) RESEARCH ON CYBER COMPROMISE OF CRITICAL
13 ELECTRIC INFRASTRUCTURE.—(1) Pursuant to section
14 201 of the Homeland Security Act of 2002 (6 U.S.C. 121)
15 and in furtherance of domestic preparedness for and co-
16 lective response to a cyber attack by a terrorist or
17 person, the Secretary of Homeland Security, working with
18 other national security and intelligence agencies, shall
19 conduct research and determine if the security of feder-
20 owned programmable electronic devices and communica-
21 tion networks (including hardware, software, and data)
22 essential to the reliable operation of critical electric
23 infrastructure have been compromised.

24 (2) The scope of the research referred to in paragraph
25 (1) shall include: the extent of compromise, iden-

1 fication of attackers, the method of penetration, ramifi
 2 tions of the compromise on future operations of crit
 3 electric infrastructure, secondary ramifications of the
 4 promise on other critical infrastructure sectors and
 5 functioning of civil society, ramifications of compro
 6 on national security, including war fighting capability
 7 recommended mitigation activities.

8 (3) The Secretary of Homeland Security shall report
 9 the findings to the appropriate committees of Congress
 10 including the Committee on Homeland Security of the
 11 House of Representatives and the Homeland Security and
 12 Governmental Affairs Committee of the Senate. The re-
 13 port may contain a classified annex.

14 (c) FEDERAL POWER ACT AMENDMENT.—Part II of
 15 the Federal Power Act (16 U.S.C. 791a and following)
 16 is amended by adding the following new sections at t
 17 end thereof:

18 **“SEC. 224 CRITICAL INFRASTRUCTURE.**

19 ‘‘(a) DEFINITIONS.—For purposes of this section:

20 ‘‘(1) CRITICAL ELECTRIC INFRASTRUCTURE.—

21 The term ‘critical electric infrastructure’ means s
 22 tems and assets, whether physical or cyber used fo
 23 the generation, transmission, distribution, or met
 24 ing of electric energy that, in the determination
 25 the Commission, in consultation with the Secretary

1 of Homeland Security and other national security
2 agencies, are so vital to the United States that
3 incapacity or destruction of such systems and assets
4 either alone or in combination with the failure
5 other assets, would cause significant harm to the s
6 curity, national or regional economic security, or
7 tional or regional public health or safety.

8 ``(2) CRITICAL ELECTRIC INFRASTRUCTURE IN-
9 FORMATION.—The term ‘critical electric infrastruc-
10 ture information’ means critical infrastructure inf
11 mation related to critical electric infrastructure.

12 ``(3) CRITICAL INFRASTRUCTURE INFORMA-
13 TION.—The term ‘critical infrastructure information’
14 has the same meaning as is given that term in sec
15 tion 212(3) of the Critical Infrastructure Informa
16 tion Act of 2002 (6 U.S.C. 131(3)).

17 ``(4) CYBER THREAT.—The term ‘cyber threat’
18 means any act by a terrorist or other person tha
19 disrupts, attempts to disrupt, or poses a signific
20 risk of disruption to the operation of programmabl
21 electronic devices and communication networks (in-
22 cluding hardware, software, and data) essential t
23 the reliable operation of critical electric infrastr
24 ture.

1 ``(5) CYBER VULNERABILITY.—The term ‘cyber
2 vulnerability’ means any weakness that, if exploit
3 by a terrorist or other person, poses a signific
4 risk of disruption to the operation of programmabl
5 electronic devices and communication networks (in-
6 cluding hardware, software, and data) essential t
7 the reliable operation of critical electric infrastr
8 ture.

9 ``(b) ASSESSMENT, REPORT, AND DETERMINA-
10 TION.—

11 ``(1) IN GENERAL.—Pursuant to section 201 of
12 the Homeland Security Act of 2002 (6 U.S.C. 121),
13 the Secretary of Homeland Security shall assess
14 cyber vulnerabilities or threats to critical infrastr
15 ture, including critical electric infrastructure and
16 vanced metering infrastructure, on an ongoing basis
17 and produce reports, including recommendations, on
18 a periodic basis for the purposes of homeland secu
19 rity, including the enhancement of domestic pre-
20 paredness for and collective response to a cyber a
21 tack by a terrorist, nation-state, or other pers
22 and for other purposes.

23 ``(2) ELEMENTS OF THE REPORT.—The Sec-
24 retary shall—

1 “(A) include in the reports under this sec-
2 tion findings regarding a cyber vulnerability of
3 terrorist threat or potential terrorist threat,
4 a nation-state threat or potential threat to cr
5 ical electric infrastructure; and

6 “(B) provide recommendations regarding
7 actions that may be performed to enhance indi-
8 vidualized and collective domestic preparedness
9 and response to the cyber vulnerability or ter
10 rorist or nation-state.

11 “(3) TRANSMITTAL OF REPORT.—The Sec-
12 retary of Homeland Security shall transmit reports
13 prepared in response to the cyber vulnerability of
14 threat to the Commission and the appropriate com-
15 mittees of Congress, including the Committee on
16 Homeland Security of the House of Representatives
17 and the Homeland Security and Governmental Af-
18 fairs Committee of the Senate, of the Secretary’s o
19 terminations under this section. Each such report
20 may contain a classified annex.

21 “(4) TIMELY DETERMINATION.—If, in carrying
22 out the assessment required under paragraph (1),
23 the Secretary of Homeland Security determines that
24 a significant cyber vulnerability or threat to cri
25 electric infrastructure has been identified, the s

1 retary of Homeland Security shall communicate such
2 a determination to the Commission in a timely man-
3 ner. The Secretary of Homeland Security may incor-
4 porate intelligence or information received from
5 other national security or intelligence agencies
6 making such determination.

7 ``(c) COMMISSION AUTHORITY.—

8 ``(1) ISSUANCE OF RULES OR ORDERS.—Fol-
9 lowing receipt of a finding under subsection (b),
10 Commission shall issue (and from time to time
11 thereafter amend) such rules or orders as are nec-
12 essary to protect critical electric infrastruc-
13 tural against vulnerabilities or threats.

14 ``(2) EMERGENCY PROCEDURES.—The Commis-
15 sion may issue, in consultation with the Secretary
16 of Homeland Security, a rule or order under this sec-
17 tion without prior notice or hearing if it determi-
18 nes that the rule or order must be issued immediately to pr-
19 tect critical electric infrastructure from an immir-
20 diate threat or vulnerability.

21 ``(d) DURATION OF EMERGENCY RULES OR OR-
22 DERS.—Any rule or order issued by the Commission with-
23 out prior notice or hearing under subsection (c)(2) s-
24 hall remain effective for not more than 90 days unless, dur-
25 ing such 90 days, the Commission gives interested persons

1 opportunity to submit written data, views, or arguments
2 (with or without opportunity for oral presentation) and
3 firms, amends, or repeals the rule or order.

4 “(e) JURISDICTION.—Notwithstanding section 201,
5 the provisions of this section shall apply to any entity
6 owns, controls, or operates critical electric infrastruc-
7 ture and such entities shall be subject to the jurisdiction
8 of the Commission for purposes of carrying out this section and
9 for purposes of applying the enforcement authorities
10 of this Act with respect to such provisions, but shall not
11 make an electric utility or any other entity subject to the
12 jurisdiction of the Commission for any other purposes.

13 “(f) PROTECTION OF CRITICAL ELECTRIC INFRA-
14 STRUCTURE INFORMATION.—The provisions of section
15 214 of the Homeland Security Act of 2002 (6 U.S.C. 133)
16 shall apply to critical electric infrastructure information
17 submitted to the Commission under this section to the
18 same extent that they apply to critical infrastructure
19 information voluntarily submitted to the Department of
20 Homeland Security under that Act (6 U.S.C. 101 and fol-
21 lowing).

1 **"SEC. 224B. PROTECTION AGAINST KNOWN CYBER**
2 **VULNERABILITIES OR THREATS TO THE**
3 **CRITICAL ELECTRIC INFRASTRUCTURE.**

4 “(a) INTERIM MEASURES.—After notice and oppor-
5 tunity for comment, the Commission shall establish,
6 consultation with the Secretary of Homeland Security,
7 rule or order, within 120 days of enactment of this sec-
8 such mandatory interim measures as are necessary to pro-
9 tect against known cyber vulnerabilities or threats to
10 reliable operation of the critical electric infrastruc-
11 the United States. Such interim reliability measures:

12 “(1) shall serve to supplement, replace, or mo-
13 dify cybersecurity reliability standards that, as of
14 date of enactment of this section, were in effect p-
15 suant to section 215, but that are determined by the
16 Commission, in consultation with the Secretary of
17 Homeland Security and other national security agen-
18 cies, to be inadequate to address known cyber
19 vulnerabilities or threats; and

20 “(2) may be replaced by new cybersecurity reli-
21 ability standards that are developed and approved
22 pursuant to section 215 following the date of enac-
23 tment of this section.

24 “(b) PLANS.—The rule or order issued under this
25 subsection may require any owner, user or operator of c-
26 ical electric infrastructure in the United States to d-

1 a plan to address cyber vulnerabilities or threats identified
2 by the Commission and to submit such plan to the Commission
3 for approval.''.
4

4 **SEC. 2. EVALUATION OF EXISTING AUTHORITIES.**

5 Section 214 of title II, subtitle B of the Homeland
6 Security Act of 2002 (6 U.S.C. 133(i)) is amended by adding
7 the following:
8 ''(i) REVIEW OF AUTHORITIES TO PROTECT CRITICAL
9 INFRASTRUCTURE.—The Secretary of Homeland Security
10 shall evaluate the capacity and authority of the Department
11 of Homeland Security and other Federal agencies
12 to ensure the security and resilience of electronic
13 communication networks essential to each of the
14 critical infrastructure sectors identified pursuant to
15 Homeland Security Presidential Directive 7 against a
16 cyber attack by a terrorist, nation-state, or other person
17 for the purpose of enhancing domestic preparedness for
18 and collective response to, a cyber attack by a terrorist
19 nation-state, or other person and to enhance the Nation's
20 homeland security posture.''.
fi
